DETAILED ACTION

1. The amendment filed January 2, 2002 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Drawings

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on January 2, 2002 have been **approved**.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3724

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 20-23 and 27 are rejected under the judicially created doctrine of non-statutory double patenting over claims 1-9 of U.S. Patent No. 6,067,883. Although the conflicting claims are not identical, they are directed to the same inventive concept and are not patentably distinct from each other because the subject matter of the application claims is fully disclosed in the patent specification and covered by the patented claims. The patented claims are inclusive for they are drafted using the "comprising-type" format and cover the subject matter of the application claim(s). Since applicant has obtained the right to exclude others from making and using the subject matter set forth in the claims of this application by virtue of the patented claims, the issuance of this application into a patent without a terminal disclaimer as provided for under 37 CFR § 1.321(b) would amount to an unjustified extension of this right.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
